**EPA Proposed Cleanup Plan:
No More Actions Needed
Nutting Truck and Caster Superfund Site
Faribault, Minnesota**

Comment Period: July 15 – August 13, 2010

U.S. Environmental Protection Agency is proposing no further cleanup action be taken at the Nutting Truck and Caster Superfund site in Faribault. This recommendation is proposed because previous work done there continues to protect human health and the environment. Soil and underground water supplies at the property were contaminated by a class of chemicals called volatile organic compounds or VOCs from industrial solvents used in the manufacturing process.

EPA will not make its recommendation final until after it reviews any comments received from the public. The Agency will also hold a public meeting and hearing if enough people request such a gathering. EPA may modify the proposed cleanup plan based on new information or public comments so your opinion is important.

The public has 30 days to submit comments on the proposed cleanup plan. Comments are being accepted July 15 thru midnight August 13. Comments can be submitted to EPA Project Manager Sheila Sullivan by e-mail to sullivan.sheila@epa.gov; fax to Sheila at 312-692-2498; mail to Sheila Sullivan, EPA Region 5 (mail code SR-6J), 77 W. Jackson Blvd., Chicago, IL 60604; or via the Web at epa.gov/region5/publiccomment.

More information on the Nutting Truck and Caster site can be found at www.epa.gov/region5/sites/nutting/

Questions or requests for a public meeting can be directed to Superfund Community Involvement Coordinator Dave Novak at 800-621-8431, Ext. 67478, 8:30 a.m. – 4:30 p.m., weekdays, or by e-mail to novak.dave@epa.gov.
